

SQUEEZEE®

by DD|COMPOUND

VACUUM INFUSION AT ITS BEST

DD|COMPOUND

The tube clip Squeeze[®] allows exact dosing of the resin flow and easy disconnecting of the resin line in the vacuum infusion.

Squeeze[®] of DD-Compound is the solution for adjusting of the resin flow and disconnecting resin lines in the vacuum infusion. The tube clip will convince by the easy use and exact dosing of the resin flow. Squeeze[®] allows disconnecting the resin line without much force. Squeeze[®] is suitable for different kinds of tubes with an outer diameter up to 15 mm. A model for an outer diameter up to 25 mm is also available: Squeezer[®]. Because of the solid construction, Squeeze[®] and Squeezer[®] are suitable for the everyday, industrial use.

Advantages of Squeeze[®]

- Ideal for disconnecting all tube lines
- Requires only a minimum of force for disconnecting resin lines
- Exact dosing of the resin flow is possible
- Designed for the everyday, industrial application
- Available in two models: for tubes up to 15 mm or 25 mm outer diameter
