

SURFASOLVE™

SOLVENT REPLACEMENT TECHNOLOGY

SURFASOLVE™ PRO WIPES

Surfasolve Waterless Hand Wipes offer a unique chemistry not available with conventional solvents or cleaners. The biodegradable formula is powerful enough to instantly remove just about anything from hands without having to rinse with water.

A special dual textured wipe holds the Surfasolve formula and traps the materials being cleaned within the towel. This prevents the materials from being re-deposited back on the skin. Surfasolve Hand Wipes have no harsh citrus solvents or alcohols to dry and chap skin. There is no pumice abrasive in the towels which can tear and damage skin actually allowing contaminants into the dermis. Surfasolve Hand Wipes have a pleasant apple scent. Wipes contain natural beeswax and emollients to enhance moisture retention of skin.

Surfasolve Hand Wipes are under saturated which allows surfaces to be effectively cleaned of all contaminants. Surfasolve Hand Wipes are packaged in seventy (70) count plastic canisters with a re-sealable lid packed six (6) canisters per case.

FEATURES AND BENEFITS

- Does not re-deposit material back onto surfaces
- Can remove almost anything from hands
- Excellent solvency for cleaning all resin systems
- Will not harm gel-coated surface
- Superior cleaning
- Non-flammable & No HAP'S
- Organic ingredients and quickly biodegrades
- Ships DOT NON-REGULATED

ECONOMY

- Lower cost than hand washing in solvent
- Can eliminate hazardous waste
- Increased productivity

APPLICATIONS

- **Quickly removes the following from hands:** Dirt, Paints, Oils, Epoxy, Polyester, Adhesives, Gel Coat, Any Ink, Dyes, Stains, Grease, Tar, Caulking, Adhesive, Urethanes, etc.
- Cleaning work surfaces Overspray removal
- Cleaning Equipment and Tools
- General Cleanups

SAFETY

- 100% Biodegradable
- Very Low Toxicity profile
- Non-Flammable
- Non-Combustible
- Low Vapor Pressure
