
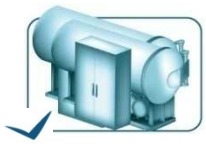
PRISE-VIDEAUTO-1/4M

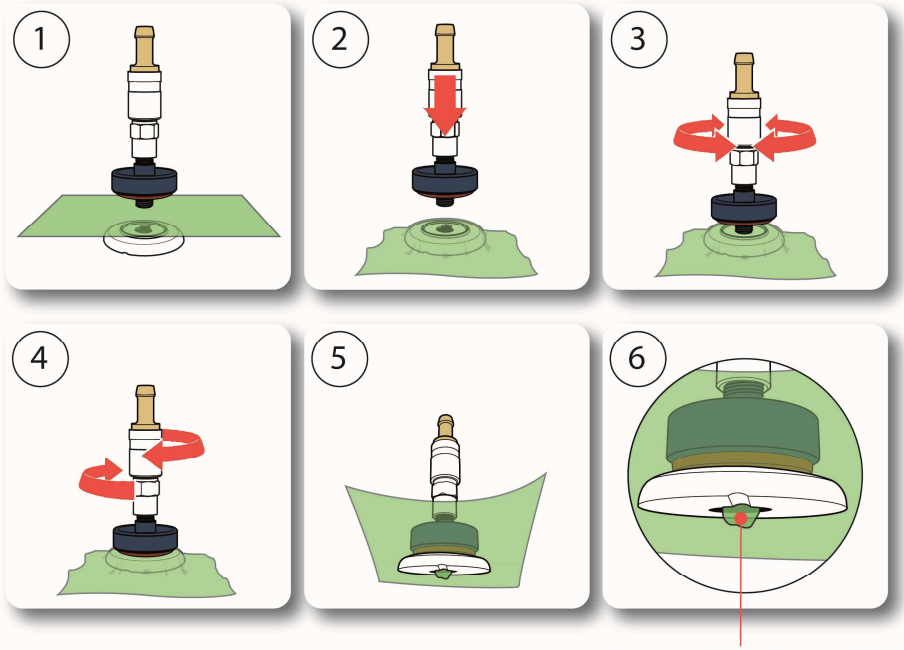
Automatic self cutting vacuum valve



Vacuum moulding

DESCRIPTION

ACPRISE-VIDEAUTO1/4M is a new generation of 2 parts vacuum valve which perforates the bagging film when the top part is inserted and threaded into the base plate. Due to the specific design of the threaded connection, the need to cut the bagging film prior to inserting the top part is eliminated. Moreover, there is no need to remove the cutting part as it is kept into the base plate. (not suitable for elastic bagging films like DIABAG80 and PO150XD2).



CHARACTERISTICS

Raw material	Seal	Temperature	Base plate shape	Base plate diameter.	Connexion
Aluminium	Silicone	260°C	Round	65 mm	¼'' male
