

DESCRIPTION

PA205T is a monolayer nylon bagging tube designed for processing of hollow advanced composite structures. The film is ideal for use in both oven and autoclave cures, up to a maximum recommended temperature of 200°C.

STORAGE

Keep this film at room temperature and normal hygrometry. Do not expose this film to daylight as **PA205T** is UV sensitive.

CHARACTERISTICS

Raw material	Color	Weight	Thickness	Styrene resistant	Max. Serv. Temp.*
Monolayer Nylon	Green	57g/m ²	50μ	YES	205 °C

Packaging	Aspect	Available Tube widths	Roll Length	Elongation at break		Tensile strength		Density
Tube Roll	Smooth Surface	25MM to 1500MM	250M	MD	TD	MD	TD	1.13
				492%	468%	105 MPa	95 MPa	

* Maximum use temperature depends upon the duration at maximum temperature and is process specific. We recommend testing prior to use.

** Option to manufacture specific width upon request
