

Diadrain MP

Microporous Flat Vacuum Channel

DESCRIPTION

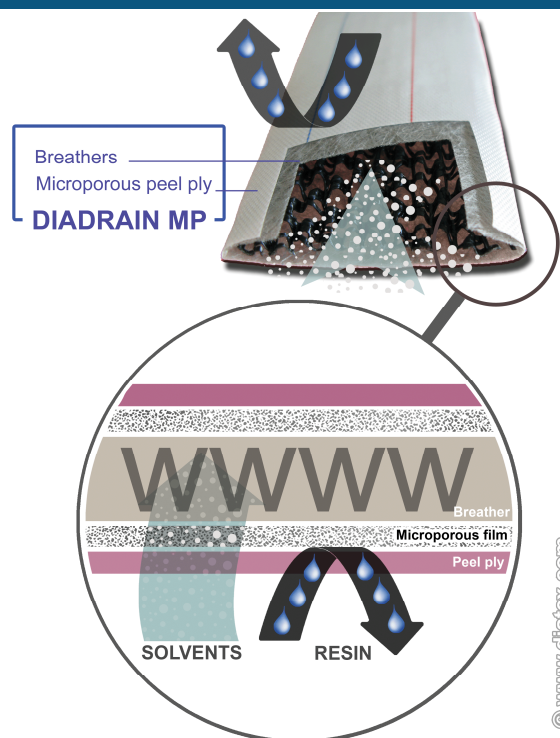

DIADRAIN MP is a microporous flat vacuum channel. **DIADRAIN MP** is placed around the mold instead of the spiral pipe : when the resin reaches.

DIADRAIN MP, it will be stopped meanwhile the gas is still eliminated from the laminate.

DIADRAIN MP can be also set at any place on the laminate. Use with our special connectors and tape to seal extremities.

Advantages:

- No marking on the laminate : no printing
- Minimize the resin waste
- Reduction of dry spots
- Minimise material consumption
- No catchpot necessary
- Easy to apply

STORAGE

Keep DIADRAIN MP at room temperature and normal hygrometry.
