

DIABREAKER Resin Brake Line

DESCRIPTION

DIABREAKER is made of a non-woven polyester filled with thermoplastic microspheres, laminated with a release film, and holding a spiral tube, which delivers the vacuum all along the product.

DIABREAKER avoids overconsumption of resin, by slowing down the resin as soon as the front gets into contact with it, while keeping the resin moving forward, and maintaining a good vacuum level.

DIABREAKER allows to drain entrapped air bubbles, to get fully infused fibers, and thanks to ELA20 release film, the product is easily peeled from the part, during demolding operation.

STORAGE AND PACKAGE

To be stored in its original packaging, protected from direct sunlight and humidity canisters, buckets or jars if required.

Note:

This technical data sheet has been created based on our latest knowledge and according to the best information and knowledge currently available. As we are unable to check if our products are used as recommended, we cannot guarantee the results. In spite of this, we will be glad to give an advice.

TECHNICAL CHARACTERISTICS

Color	Yellow / White
Release	Yes (yellow side)
Max. Serv. Temp.	120°C
Thickness	2 mm
Width	100 mm
Weight	60 gr/m
Length	25-50 m
