

RAVER400SF

Double Side Adhesive Glass Screen Tape

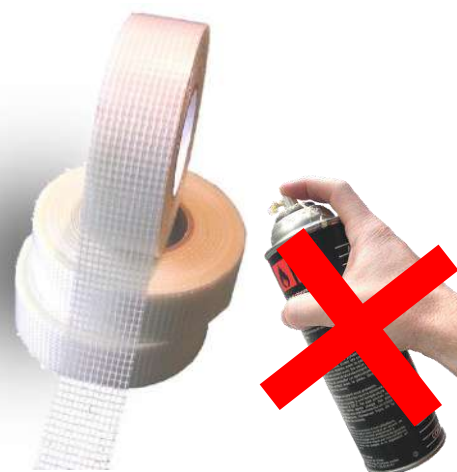

DESCRIPTION

RAVER400SF is a double side adhesive glass screen made to set fibers, consumables and the core materials during vacuum Infusion process or vacuum moulding process. This double side adhesive screen can be used in direct contact with the fiber. **RAVER400SF** doesn't modify the resin flow.

RAVER400SF has been made to replace hazardous aerosols or glue pray guns.

100% non hazardous, solvent free, this adhesive tape is the best solution to set safely the fibers. With **RAVER400SF** you know exactly the quantity of glue used per m² more you can control this quantity which is not the case with spray.

RAVER400SF is made with non hazardous glue 100% soluble with resins. After infusion, the glass screen works like a reinforcement.

SHELF LIFE

One year: Keep this product at room temperature and normal hygrometry.
